

Casteo Seat

The Casteo Seat is a versatile bench that comes in different configurations, with or without a backrest and armrests. It features a sturdy design with two tubular steel supports and a folded steel sheet frame for the seat. The seat can be equipped with optional slats made of hardwood, thermo-treated pine, or WPC, while the backrest and armrests are constructed from folded steel.

For durability and protection against the elements, all metal components, including supports, seat frame, backrest, and armrests, undergo a galvanisation process. Additionally, a coating of thermosetting polyester powder is applied to enhance both the aesthetic appeal and resilience of the bench.

To ensure longevity and resistance to corrosion, all fasteners utilised in the bench are made of AISI304 stainless steel. The bench is designed for secure installation with prepared holes for ground fixing through included threaded bars. This feature makes the Casteo Seat suitable for both indoor and outdoor use, providing stability and preventing potential theft or vandalism.
